

# DEFENDER

## VEE GATE

maximum security

If you need uncompromising roadway security then the Defender Vee Gate is your gate.

This crash tested swing gate is capable of withstanding the impact of a 7.5 ton vehicle travelling at 80 kph (50 mph), while remaining fully operational after impact.

### FEATURES

- High impact capability
- Rapid cycle time
- Shallow foundation
- Minimal footprint and operational clearance required

### BENEFITS

- Robust
- Safe
- Easy to install
- Low maintenance

# DEFENDER

## VEE GATE

maximum security

### TECHNICAL SPECIFICATIONS

- Fully welded, shot blasted steel sections create an impenetrable and durable entrance / exit way
- Open and close cycle time of 10 seconds minimizes site exposure time and reduces security risk
- Crash tested and certified (PAS 68)
- PLC controlled for easy programming and integration into overall perimeter security system

### STANDARD FINISH

- Galvanized
- Custom powder-coated colors available on request

### OPTIONS

- Uninterruptable Power Supply (UPS)
- Traffic Lights (bidirectional)
- Safety Photo Cell
- Strobe Light
- Detection Loops
- Cold-Weather Kit

TECHNICAL DATA	UNIT	VEE GATE
Voltage	VAC	240V
Frequency	HZ	60
Current	A	15
Duty Cycle	%	70
Max. Clear Drive Thru Width	Feet (m)	13' (4)
Max. Gate Panel Height	Feet (m)	6.5' (2)
Gate Infill	Panel Infill	Choice of Infill
Finish	Coating	Galvanized and/or Powder-Coated
Operating Temp Range	°F (°C)	-13 to +150 (-25 to +70)
